

ABDUL MALIK

Flutter Developer

+923489278446 | officalabdulmalik2@gmail.com | [Linkdin](#) | [Islamabad Pakistan](#)

PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of experience delivering mobile applications across marketplace, SaaS, and B2B products. Experienced in building maintainable applications using clean architecture, SOLID principles, state management, and integrating backend services like Firebase and Supabase.

TECHNICAL SKILLS

- **Flutter:** Flutter, Dart, Clean Architecture, State Management (Bloc), Responsive UI, Dependency injection
- **Backend & APIs:** RESTful APIs,, WebSocket, Firebase, Supabase, Google Maps, Stripe, RevenueCat
- **Tools:** **Git, GitHub**, Android Studio, Xcode, Jira, Cursor, GitHub, Claude Code, Git, Appstore connect, Google console

WORK EXPERIENCE

Flutter Developer – DcodaxTech, IslamabadPK

June 2024 – Present

- Contributed to multiple Flutter projects, including B2B enterprise platforms, restaurant management systems.
- Refactored the architecture of 4+ Flutter applications using BLoC state management, reducing duplicated logic by 10% and improving code maintainability.
- Coordinated with design and backend teams to implement UI, integrate APIs, deliver functional features on time.

Flutter Developer – ItechExperts, Peshawar PK

July 2023 – June 2024

- Built responsive user interfaces with MediaQuery and ScreenUtil, ensuring consistent layouts across 10+ screen sizes.
- Developed an internal Flutter package, Quick UI, adopted across multiple projects to standardize UI components and reduce repetitive ui development tasks.
- Refactored a B2B Flutter application using BLoC state management and clean architecture to improve code and maintainability.

Flutter Developer – JMMTech, Peshawar PK

December 2021 – June 2023

- Learned Flutter development in a professional environment, progressing from onboarding to independently implementation application features within the probation period.
- Integrated Firebase Authentication, Cloud Firestore, and real-time database services to support secure and real-time data synchronization in applications.
- Collaborated using Git-based workflows, including feature branching, pull requests, code reviews, and Agile development practices.

PROJECTS

MyFitnessCal

Developed an AI-powered fitness and nutrition SaaS platform, handling architecture, feature development and deployment,
Managed App Store and Google Play submissions, resolved review issues, and published production releases on both platforms.

MyDeliveryUs

Delivery management application for restaurants and drivers with real-time order tracking, driver assignment, navigation, and order management.

Implemented core rider-side functionality, integrating Google Maps, delivery request workflows, and order management.

HBKBlanket

B2B e-commerce Flutter application for local blanket retailers. Developed product listing, shopping cart, and checkout flows, and implemented responsive user interfaces across the application.

Refactored the application to Clean Architecture, reducing redundant code by 20% and improving maintainability.

EDUCATION

BS Computer Science – Virtual University

2022 – 2025

CERTIFICATES

Flutter Development – Udemy

2023

Diploma of information technology – Technical Board Peshawar

2022 – 2023
